

	In the event of a reported COVID 19 positive result...
	Immediate notification of Candi Bothum
	Immediate notification of the Public Health Department.
	<ul style="list-style-type: none"> Follow ALL guidance/instructions given by the Public Health Department
Notification	Notify all persons from contact tracer of confirmed/suspected case or as per Public Health department recommendations
	Do not release the name of the individual with the confirmed or suspected case to others at the OHSET event (patient privacy)
Contact Tracing/Symptom Tracker	Importance of maintaining a contact tracer report , taking attendance and screening for symptoms at every OHSET event
	Submit Contact Tracer Report to Public Health Department as instructed
Quarantine	Anyone who was in close contact with the confirmed/suspected case should quarantine for 14 days (or per Public Health Department recommendations)
Close Contact	Defined as someone who was within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period* starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to test specimen collection) until the time the patient is isolated
	<ul style="list-style-type: none"> <i>Factors to consider when defining close contact include proximity (closer distance likely increases exposure risk), the duration of exposure (longer exposure time likely increases exposure risk), whether the infected individual has symptoms (the period around onset of symptoms is associated with the highest levels of viral shedding), if the infected person was likely to generate respiratory aerosols (e.g., was coughing, singing, shouting), and other environmental factors (crowding, adequacy of ventilation, whether exposure was indoors or outdoors).</i>
Return to Play	Follow Providence Return to Play Protocol
	(see attached document)
	If positive test, non-severe illness
	<ul style="list-style-type: none"> >10 days since symptom onset
	<ul style="list-style-type: none"> 24 hours without fever reducing medications
	<ul style="list-style-type: none"> Other symptoms are improving
	Positive Test, asymptomatic
	<ul style="list-style-type: none"> >10 days from the Positive test
